Add a new record with Store=50, Date='01-01-2024', Weekly_Sales=1500000
@user_1_Walmart_Sales, then delete it

This query inserts a new record into the *user1WalmartSales* table with the specified values for *Store*, *Date*, and *WeeklySales*. The other columns will be populated with NULL or default values if they are defined.

SQL to Execute:

SQL

COPY

```
DELETE FROM user_1_Walmart_Sales WHERE Store = 50 AND Date = '01-01-2024' AND Week:
```

Result: Successfully affected 1 row(s)

Gemini 2.0 Flash

This query deletes the newly added record with Store=50, Date='01-01-2024', and Weekly_Sales=1500000.

SQL to Execute:

SQL

COPY

```
DELETE FROM user_1_Walmart_Sales WHERE Store = 50 AND Date = '01-01-2024' AND Week:
```

This operation will modify your data. Please confirm:

Execute

Cancel
